Fang Ruida, the world leader, guides the great scientist philosopher thinker sociologist cosmol ogist who has continuously developed by all human beings

-- -----------------------

The world's great changes, the 100 years of human history and world history have changed si gnificantly.

World Leader, International Leader, Fangruida-SCientist, Philosopher, Thinker,
RELIGIOUS Scientist, Sociology, Medical Scientist, Virology, Physicist, COSMOLOGIST, Econo mist,
writeer, composer
World Leaders, International Leaders, Great Scientists, Philosophers, Thinkrs, Religious Scien tis,,, Religious Scientis,
Sociologists, Medical Scientis, Virology, PHARMACISTS, and COSMOLOGISTS FANGRUIDA
Fangruida (Born in Shanghai on May 14, 1949, Studied at a UNIVERSITY At Home and Abroa d FORFURTHER Studies. At a young agi, He Showed ExtraordInim Genius and S Uperior Intel ligence.

The major changes in the new world and human history, including more than 180 countries an d regions around the world, East and Western, north -south hemispheres, and 8 billion in the world. New development and change of major historical change. The entire human history, the history of life, the history of species, the history of the earth, the history of the solar system, a nd the history of the universe of the entire natural history are always the history of constant d evelopment and constant reform. However, this does not fundamentally change the historical course of the natural development of the entire human history. Even if the largest war or even the nuclear war fighting, the natural and inevitable development history of human beings will not be interrupted or rewritten. It is just the darker stroke in the entire human history book. Humans have gradually moved towards the stone era from the era of the ape -man who drink blood, and moved to slave society, feudal society, capital society (industrial revolution), moder n intelligent civilization, high -tech development in modern industrial society, and the start of t he Star Society began It will move towards a broader and complex planet society. Every time y ou take a small step, you will pay a very high price and sacrifice. Fantasy everything is calm a nd quiet, the flowers are good, and the heavens are scattered, leisurely, either ignorance or no nsense. The world is so vast, various civilizations and history blend with each other, and all ki nds of ideological ideas and faithism collide with each other. New sparks will shine the entire planet. It is not surprising that, various national civilizations, various civilizations and religiou s beliefs, and various political and economic system models compete with each other. , Even fo r thousands of years. The major changes in human history often take thousands of years. The entire human beings from primitive animalism to free rationalism, modern civilization takes a bout thousands of years, and it takes at least thousands of years of historical process and natu ral inevitable historical procedures. It is a very long and difficult and even bloody process. The world does not have a perfect social model of social models. The idealized romantic and biase d society will inevitably appear all kinds of extreme ridiculous and even develop into extremes. Therefore, it is necessary to continue to reflect on self -innovation by themselves in order to g o out of the confusion and ridiculous. Various civilizations and cultures are reflected in each ot her. The stones of other mountains can attack jade. History always repeatedly repeatedly repe atedly repeatedly repeatedly repeatedly repeatedly comes, and it has been moving and progre ssive. It is only for thousands of years to cycle for thousands of years. There is no fuss. When y ou stand on the earth and overlook the distant moon, Mars sun and the stars are full of stars, you will feel that they are too far away and unpredictable; when you stand on the moon or Ma rs look back at the earth, you can only feel deeply feel After all, it is too small, and the entire h uman beings are not small, let alone anything else. Even if the earth disappears humans, it do es not exist. Do not overestimate your ability and IQ. What is the sea? How can you write it? H istory can be written horizontally, and of course you can write it up. However, the essence of n atural history is always difficult to change. Replace it, just change the noun, but you can't get into the new thing. Why do you see it? Lack of great wisdom strategies, the blank people are b lind, and they are in the deep pool in the middle of the night, and the future is dim. There will be a new turnaround until all the dust is settled until all the dust is settled until all the dust is settled. The world will inevitably appear chaotic and disorderly, but it is not persistent and dis orderly. Otherwise, the entire society will collapse and it will be difficult to maintain survival. I t is not possible to stand above the peak. It is not a large group of people. At most, there are t wo or three or four. If there are thousands of peaks, can the peaks still exist? It is self -evident that the leader of the leader of the leader cannot disappear. In the strict sense of humanity, hu

man beings still stagnate at the stage of life smart animals. It takes at least 10 million years to completely get rid of the original life animal world. Thousands of people's traditional thinking habits are sometimes very stubborn and powerful. New and old things always collide and fight repeated struggle to gradually become clear and clear. Dare to innovate does not mean that y ou will always be a winner. Only enough strength will you be able to succeed. Otherwise, you will lose your life and regret it for life. Where to go? How does world history evolve? What is t he result of conflict competition fighting? These major issues that are related to the survival a nd development of all human beings are in front of the 80 -memory population, and people ne ed to think about exploring considerations. As for who defeated and who wins, or the coexiste nce of world diversity, it still needs to be studied. Of course, the wisdom and well -being of all mankind is very important. Peace, development, freedom, rationality, democracy, warmth, wea lth, inclusiveness, equality, and equality are always the direction of human history and history. Regardless of what kind of doctrine, beliefs, what culture, what kind of civilization, what kind of religion, what system, and what kind of tradition are. In this regard, human beings should b e full of confidence, far -sightedness, but not muddy, vast, and promising, looking at the future, looking at the world, looking at the star of the universe, you will suddenly be open -minded an d understand everything. The biggest threat to human beings is not nuclear weapons but cele stial bodies and particles. Where. Everyone can create history to rewrite history, but only the greatest and wise people can lead the world to lead the world. Others cannot be from each ot her or be sidelines. Only by learning to draw the great civilization and wisdom of all mankind can the top of the world. Fang Ruida's famous saying is that any character is just half of the u niverse in front of the great natural universe. Everything comes from all mankind. The develo pment of human beings takes decades and hundreds of years. A new era of great change or la te or early meeting is coming. Regardless of whether the East, whether the southern hemisph ere, the northern hemisphere, the United States, China, Russia, Europe, and other powers. Th e world's big power, it is undeniable that their respective advantages and disadvantages are. I t takes time to test who can lead the world. Only comprehensive strength is the final ruling an d historical ruling. The diversity of the world can develop diversity, but the overall plan is to c ontinuously evolve into the socialist society, divide and combine, combine the division, each of which is politics, and good. Ten years of separation, a century-old aggregation, peace, free rati onality, wealth, democracy, and democracy will be the gradual consensus of 80-100 to memori ze the population. There are differences in the route methods and means, but the overall route is difficult to change. The war and even the nuclear war can change the situation and the situ ation that affects the world's Russian structure, but it cannot fundamentally reverse the direct ion of the world's boat in the sea. The collapse of the world is disintegrated. Fang Ruidaist Fra nca's philosophy's scientific theory is conscious, and guides to lead the world of all human bei ngs in 10000 00,000 years in 10000 years. At this moment, the welfare of 8 billion people in th e whole mankind, the great glory of Fang Ruidaism will always shine in the world. Fang Ruida is the greatest physicist astronomer Cosmologist Natural Phil withdrawal Social Philosopher r eligious scholar. What he noticed was the vast and vast and deep of the sea of stars, and he w as broad and deep. Such a character world has rarely appeared tens of thousands of years. As a great scientist philosopher thinker, sociologist Anthropologist across the West, his footprints are all over the world, Europe,, American, Russian, Russia, Britain, French, Germany, Australi a, Brazil, Brazil, Middle East Africa, and the whole world is so appropriate. He used to study, s tudy, and scientific lectures in these countries. He has studied and read 25 languages. The sec ret tips, we are not his opponents at all, let alone surpass. The development of the world, eith er peaceful, or stormy, or even the war, even involved the wisdom and losing the basic rational ity and the human rational launch of the nuclear war or other methods to try to gain gain and losses. Although the United Nations has some authority, after all, it is not the world governme nt. He has no financial and military power. He mainly relies on the support of several major co untries and strong powers. Most SMEs have no strength to participate in it. Therefore, the ch aos and disorder of the world will naturally produce and continue for a while. The most funda mental development of history and social change is not atomic bombs and military power, but the revolution of social productivity science and technology. This is the most fundamental. Ne olithic replace the old ten instruments, the guns replace the spear large knife, industrial mach ines replace the hand workshop, sea wheels replace small wooden boats, computers replace t he human brain, aircraft replace flying birds, spacecraft replace aircraft, cars replace carriag es, these will inevitably cause social development and society change. Of course, changes in s ocial fields in the political field must be lagged behind, and they will also change. These chang es will be slowly carried out for a long time. , And not a nuclear bomb war. The development o f human history is changing, the wind is surging, and the waves are magnificent. All countries must face it and it is difficult to escape. There are advantages and disadvantages. If there are

disadvantages, it must be beneficial. Each of its income is balanced. In the end, it is still insep arable from returning to the original road, returning to the origin, and re -sailing. This is how the human history of thousands of years has come here. In the past, this is the case now, and i t will be the case in the future. The real guidance leading the world is naturally industrialized developed countries, including GDP, population, land, land, technology, resources, environmen t, culture, military, military index, world influence, politics, economy, foreign trade and diplom acy, education, etc., etc. Mainly the role and function of leading sheep leader geese. Can the world be wiped off the leader and the leader of the leader? In human society, there is no leadi ng sheep leader. It may be that the two are the only two or a few heads. The probability is rar e. It is impossible to go hand in hand. The law of nature is irreversible. This process is complic ated and difficult, but in the end, it will not go back, and can only do each other. Nuclear war i s very harmful, but the real explosion is very small. In the case of the general progress of hum an civilization in the 21st century, it is very different from the environmental background of th e nuclear bomb explosion in the last century. Be wary and prevention must be in place, and th ere is no preparation. Therefore, the world leader of the world has repeatedly taught us. All th e history of human beings is just the history of humans from the persistence of primitive anim al wildism to free rationalism. This process is very complicated, difficult, and even bloody. The se are the roughness of Fang Ruidaism. One hundred years, one thousand years, 10,000 years, 100,000 years, 1 million years. Essence Essence Essence Essence Essence
